

SECURITY GUARD AND DOG

Premiere Security Guarding

Dog Security

All Year Security provide specially trained general purpose dogs, and narcotic or bomb detections dogs they can be active or passive. They will allow your officials to deal with detections as and when they see fit.

In addition to this, we also have dual purpose dogs, which are trained in both personal item search and protection. All specialist dogs are trained by accredited training instructors, from NASDU and MBIDT.

Security dogs are trained to pick up on intruders or hidden persons by, scent, sight or sound, to protect their handler by standing their ground and showing controlled aggression. When confronted with threatening behaviour they are able to detain a suspect until the authorities arrive to deal with the situation.

Security dog guarding is one of the most effective solutions to guarding people, premises and property.

Our specialist dog teams are an asset to any force concerned with security and our presence can greatly increase the effectiveness of any team.

Our dogs are under the control of the dog handler at all times. Their function is to alert our handler of any human intruder and protect the handler where necessary. An experienced dog patrol unit can be equally effective as up to five static guards. Not only providing a visual deterrent, dogs have powerful hearing and scent senses and are able to search and find human presence better than up to five static guards. Guard dogs are invaluable in searching and securing large areas.
