

VACANT PROPERTY ALARM

Premiere Security Guarding

Vacant Property Alarm

Unoccupied properties and sites are facing an increasing risk from squatters, travellers and criminal damages. Property owners are often the last to find out that a property that they own have been subject to criminal damage – as they are can be hard to trace and often no attempt is made.

CCTV and manned guarding are often not put in place either due to the cost or the fact that no electricity is available on the site or a redevelopment is in the pipelines.

Fast Deployment

All Year Security can deploy a vacant property alarm system in any property within the M25, typically within 6 hours notice.

These purpose built units can provide internal and external monitoring of properties, construction sites around the clock for 30 days without power supply.

The units are connected to a 24 hour control room, any activation of the alarm (usually silent) will result in the immediate dispatch of a patrol unit to investigate the cause.

“our vacant property alarm system can be deployed in any property within the M25 within 6 hours notice”
